NEW YORK, May 13.—Business was re numed upon the Stock Exchange this norning with the transactions in large elume and for the most part effected a aterial advances above Friday's fina the early dealings were St. Paul, Unio Pacific, Missouri Pacific, the Erie issues and the United States Steel stocks ng the specialties Amalgamated Cop per was notably strong. The local trac-tion stocks were dull and neglected.

Virtually nothing transpired bearing up on the financial situation since the clos Friday except in regard to the moring last week's developments in Northern Pacific affairs. At the same time the act-ual status of the control of the property in doubt inasmuch as in their ely that it was in absolute contro

London furnished irregular changes for American stocks, but advances predominated. St. Paul was particularly strong in the London market, while Northern Pacific was quoted at a sharp reaction. The beginning of the settlement upon the London Stock Exchange did not reveal the tremendous short interest in Northern Pacific that had been expected to develop there, and, on the contrary, the stock was reported to be loaning flat in that market. The dealfings here for foreign account upon the opening of business were conducted upon both sides of the market. As was the case last week, no little uneasiness appeared to exist in regard to the probable money market developments, but it was hoped that the banks, though continuing their liberal and courageous policy of last week, would do much to alleviate the strain.

Other active features of the early deal-London furnished irregular changes for

of last week, would do much to aneviate the strain.
Other active features of the early dealings apart from those already cited, were Ontarla and Western, the Southern Rall-way shares, and the Wabash issues. Consolidated Gas was fairly active, and materially higher. Sugar Refining also developed strength and activity after the intital transactions. Missouri Pacific was Jumped up ten points.

The recovery from the panic continued in the Stock Market this morning and, in the greater part of the list, the early prices were well up toward the level be-fore the break. The advance had been fore the break. The advance had been continuous since Thursday afternoon and it seemed probable that there would be a recession before the end of the day. It is not in the least likely that the bull market can be resumed without a tremor after such a hurricane as that of Thursday. A "traders' market" for a week or two should not surprise conservative people. The level before the break was too high in the greater part of the list. The low prices were too low in most cases. Fluctuations between these two levels might be wide and important and such a market is what should be expected logically. The speculation will not be sayeid as it has been. The public has lost so much money that it will not be eager for some time to come. The bargain hunters that bought stocks on Thursday and Friday will not stay long with the market. On the other hand the shorts have had a lesson and will be likely to take profits quickly where they have the nerve to self short at all. where they have the nerve to sell | Capital | 150 t all | West End | 197 A gradual readjustment of prices to

There was almost nothing in the way news this morning. Mr. Morgan has a rived in London and has had a meetirived in London and has had a meetin with the stock exchange people. The London despatches seem to indicate that the shorts there will be allowed to settle on some equitable basis, probably 146, and that there will be no trouble. On this sid it seems very evident that the two factions in Northern Pacific have not adjusted their differences. The Indications are that they may both be buying Union Pacific stock today.

Northern Pacific was not traded in th morning, not one transaction having bee recorded at 11 o'clock and only one, at 1 was particularly active and bouyant, a

first week of May and up to the present time this year have been phenomenal. The outlook is for a general combination of some kind among the Gould railways, with the Missouri Pacific as a nucleus. This fact, with the earnings of all the Southwestern railways making the best showing in the country, makes the outlook for these stocks an excellent one. The level of prices before the break was extreme, but not more so than that in many other parts of the list, and not entirely unjustified by the outlook. The break was particularly big in these stocks, because prospects and not dividends were the basis on which the best level had been made. There has been a fine recovery since Thursday, but a number of the group look equal to a further advance. first week of May and up to the present equal to a further advance

Atchison, common stock, looks to be sale on the bulges. It is too high for its dividend return, compared with other parts of the list, even although fifteen points have been taken off the top level. The preferred stock, on the other hand, is likely to sell higher than it has at any time yet, and will be bought on all recessions by conservative people.
